

Komunikacijska ploča

Komunikacijska ploča jedan je od niskotehnoloških oblika potpomognute komunikacije. Djeca koja ne razumiju jezik ili ne mogu komunicirati putem govora mogu pokazati na simbole i na taj način prenijeti poruku o tome što žele raditi, gdje žele ići ili komentirati događaje oko sebe i odgovoriti na pitanja. Ostale osobe mogu komunicirati s njima pokazivanjem na simbole uz istovremeno govorenje.
